SUMMARY

Dynamic Software Engineer proficient in MERN, JavaScript, C++, and Python. Proven problem solver with over 300 challenges solved on LeetCode and GFG. Skilled in modern UI design with Tailwind CSS, data visualization using Power BI, and web scraping with Python. Dedicated to crafting scalable, high-performance applications that enhance user experience.

TECHNICAL SKILLS

JavaScript	mongoDB	Tailwind CSS	C++
React.js	SQL (PostgreSQL)	HTML	C
Node.js	Power BI	CSS	Python
Express.js	Git	Problem Solving & DSA	Prompt Engineering

PROFESSIONAL EXPERIENCE

Front-End Web Developer, CollegePur Feb 2025 - Present

- Work on React.js applications with Redux, improving state management.
- Built responsive UIs using JavaScript and Tailwind CSS for better UX.
- Optimized frontend performance, enhancing load times and efficiency.
- Used Git for version control, ensuring seamless team collaboration.

Software Engineer Engineer, HelpOps Hub Feb 2025 - Present

- Working on React.js for frontend development and Node.js with Express for backend features.
- Assisting in MongoDB database management for efficient data handling.
- Learning and implementing authentication and security features.

PROJECT

Infinite Quests

Built a responsive React.js website to explore countries by continent or name and discover stars, black holes, galaxies, and planets with search and filters. [Live Link](#)

E-commerce

Developed a React.js e-commerce site with product browsing, cart management, and a seamless shopping experience to enhance user engagement. [Live Link](#)

Simon Says

Built an interactive JavaScript game with dynamic color patterns and sound effects to enhance engagement and improve memory skills. [Live Link](#)

Real-Time Data Scraping & Visualization

Scraped real-time data using Pandas & BeautifulSoup, then visualized insights with Power BI for trend analysis. [Check out](#)

EDUCATION
